"How doing auditory training just minutes per day might help you understand speech better"

Anne Olson, PhD, CCC- A is an Associate Professor and Division Director in Communication Sciences and Disorders at the University of Kentucky since 2004. She is also a certified audiologist through the American Speech Language and Hearing Association and a fellow of the American Academy of Audiology. She teaches courses related to audiology and aural rehabilitation for undergraduate students and focuses her research on interventions that go beyond hearing aids.

What is Auditory Training? Auditory training refers to a set of formal listening exercises that can be performed to improve speech understanding. Current auditory training exercises can be completed at home using gamelike formats on tablet based devices.

OBJECTIVES

- To describe and define auditory training for adults with hearing loss
To describe how effective auditory training programs are based on current research
To increase awareness about auditory training programs that are available online, for iPhone, iPad or computer application.
To determine if you might be a good candidate to try auditory training.

The meeting is realtime captioned by Sworn Testimony, PLLC and is free and open to the public.
